Q17 Kindly attach any relevant information here -

Q18 Part E. As per agreed reporting format, Parties are invited to provide additional comments on this article in free text. Kindly use the box below. -

Q19 2. Are there facilities for final disposal of waste consisting of mercury or mercury compounds in the party's territory? **Yes**

Q20 If yes, if the information is available, how much waste consisting of mercury or mercury compounds has been subjected to final disposal under the reporting period? Please specify the method of the final disposal operation/operations.

Current Practices

Currently, the only facility for the management of Hazardous waste is the storage site in Swaqa hazardous waste landfill Swaqa has been established in the 1980s. The site utilizes 500 hectares fenced area for the reception, storage and ultimately the treatment and disposal of hazardous waste. The site is located at approximately 120 km South East of Amman in a remote area of desert.

Swaqa is managed by the Ministry of Environment, which applies a gate fee to the hazardous waste stored therein. Swaqa as hazardous waste storage Facilities receives mercury containing waste to be stored in relatively good conditions, Based on the above, it results quite clear that the management of hazardous waste is not sustainable from the financial, environmental and social standpoint. In the absence of a sound enforcement, most of the hazardous waste is not properly collected and managed.

Q21 Kindly attach any additional relevant information here -

Q22 Part E. As per agreed reporting format, Parties are invited to provide additional comments on this article in free text. Kindly use the box below. -

Page 4: PART C and D

Q23 Part C. Comments regarding possible challenges in meeting the objectives of the Convention (Art. 21, para. 1)

Some challenges need to be addressed for effective management of Mercury containing waste;

- The government currently does not have the technical and financial resources, for an effective management of Mercury containing waste.
 - lack of awareness on Mercury impact on human health and the environment on institutional and household levels; the destination for Mercury containing waste on the household level is municipal landfills, Mercury waste is mixed with municipal waste;
 - lack of capacities for storage and disposal of Mercury containing waste.
-

Q24 Part D. Comments regarding the reporting format and possible improvements, if any

the format is simple to use and short

Q25 Additional information to supplement that request -
may be attached
