

Strengthening capacities to control emissions and releases of mercury in Peru

PROJECT OBJECTIVE

The overall objective of this project is to strengthen the country's institutional capacity to control national emissions and releases of mercury and contribute to identification of priority actions to address emissions and releases under the Minamata Convention.

PROJECT SUMMARY

To support Peru in meeting its obligations under the Minamata Convention and in controlling national emissions and releases of mercury, this project will train staff of national institutions in quantification and reporting of emissions and releases of mercury, put in place a procedure to update national mercury emissions and releases inventory, and will support the drafting of a national plan for emissions and releases control for stakeholder review. In addition, the project will raise stakeholder awareness of environmentally sound interim storage of mercury and disposal of mercury.

BUDGET	DURATION	RELEVANT ARTICLES	PARTNERS
 USD 126,000 Applicant contribution: USD 61,041	 27 January 2021 - 26 March 2023 (26 months)	 Article 8 - Emissions Article 9 - Releases Article 10 - Environmentally sound interim storage of mercury, other than waste mercury Article 11 - Mercury wastes Article 18 - Public information, awareness and education	 Ministry of Production, Ministry of Energy and Mines, Organism for Environmental Assessment and Control, Ministry of Transport and Communication, Ministry of Health, National Authority of Water, National Superintendency of Customs and Tax Administration

PROJECT RESULTS

- 
OUTPUT 1
 Training of national institutions' representatives in quantification and reporting of emissions and releases of mercury accomplished
- 
OUTPUT 2
 Workplan for the updating process of the national inventory of emissions and releases of mercury developed
- 
OUTPUT 3
 Awareness about emissions and releases from the interim storage of mercury and the disposal of mercury raised in stakeholders
- 
OUTPUT 4
 National Plan for the control and reduction of emissions and releases of mercury drafted and presented to relevant stakeholders
